

Portfolio Write Up

Resources:

The resources I utilized to complete this project were our class notes, w3 Schools, Stackoverflow, and Bootstrap documentation.

Expected Grade:

The grade I expect to get is a B+ or A-. I worked very hard on this website and went through many hours of frustration trying to get it absolutely perfect. I attended office hours and every lecture and discussion leading up to this portfolio, and feel like the time I put into this website reflects that effort.

I believe my website hits every single requirement, and beyond. I think it looks very professional, and with the use of some embedded iframes and a bootstrap carousel, I think it goes the extra mile. My website looks good on all phones, iPads and desktop displays, and has contrasting colors for accessibility. Every photo has alternate text and links change color when you hover over them, making it more user friendly.

Extras:

- Bootstrap carousel with 7 images, scrolling automatically
- iTunes embed
- Soundcloud embed
- A logo I designed myself that SPINS when you hover over it, and when you click on it, takes you back to the home page
- An overall cohesive design
